# 4 Barriers

to learning

that can block  
mastering a language

*Speak English*

### **1. The phenomenon of discounting**

when you hear an idea that is different or inconsistent with the way you see the world, you will generally turn down your level of listening and understanding and discount.

In other words, you will decide that something or somebody is not worth considering or giving attention.

**2. Low level of presence** – one of the most valuable commodities is your presence, focus and concentration. With all the technologies people walk around being “really there and not here”. If your presence is scattered, you are not able to accept the information. If you are not present, you are not learning.

**3. Intellectually closed** – I-hear-it-all-before type of people. If you fall in love with what you are without seeking for opportunities to grow, this is the end.

**4. Fear to make mistakes -**  
if you are not making mistakes,  
you are not growing.

It is important to realise that  
a failure is a stepping stone  
to success while learning.
